

Stress Test: Document PDF Editor Layout Engine

This is a standard paragraph used to test coordinate stability and line merging. It should be extracted as a single logical block without horizontal drift. The text should align perfectly to the left margin at 50px.

- Level 1: First item in a bulleted list
This is a wrapped line for level 1 that should align with the text above, not with the bullet marker itself. Drift prevention is key here.
- Level 1: Another top-level item
 - Level 2: Nested bullet item with a different marker
 - Level 3: Even deeper nesting with a dash marker
 - Level 3: Continuing the deep nest to test indentation
 - Level 2: Back to level 2 indentation
- Level 1: Back to the main margin

Mock Table / Multi-column Layout:

Column A - Data 1	Column B - Secondary Data	Column C - Tertiary
-------------------	---------------------------	---------------------
