■ Welcome to the Editor

Fast. Precise. Built for text■heavy documents.

Thanks for trying out this editor. This tool is designed to make working with text■heavy documents smooth, fast, and intuitive — especially resumes and structured documents.

■ Key Features

● Word■level editing (edit, select, and fine■tune individual words)

● Style controls (font size, bold, italic, alignment, spacing, etc.)

● Color changer for text and elements

● Fast rendering and smooth editing experience

● Export to PDF with layout preservation

■ Best Use Cases

■ Resumes and CVs

■ Cover letters

■ Reports and text■heavy documents

■ Simple structured layouts

■■ Current Limitations

This editor is currently optimized for simple and text■heavy documents. Some complex layouts may not import or render perfectly.

- Complex tables

- Advanced multi■column magazine layouts

- Heavy image■based PDFs

- Diagrams and design■intensive documents

If a document is too complex, it may be imported as a non■editable background or may not render exactly as expected. We are continuously improving support for more advanced layouts.

■ **Start editing and build something awesome.**
